EDUCATION

M S Ramaiah Institute of Technology, Bengaluru, India

Jul 2022

Secured a Bachelor of Engineering in Computer Science Engineering with *First Class*

PROFESSIONAL EXPERIENCE

Otelier, Bengaluru, India | FullStack Developer

Aug 2022 -Present

- Worked with the Product Engineering Team on Full-stack software engineering projects, managing data for global hotel brands, providing front-end visualization for analytics, and spearheading UI/UX feature development with Angular for efficient CRUD operations.
- Led the team responsible for adapting the application to meet i18n standards for 10 APAC countries, successfully managing currency and date-time formats across the system.
- Significantly improved application security by implementing token invalidation for logged-out sessions and adding CORS (Cross-Origin Resource Sharing) filtering.
- Built services for fetching and processing data from SFTP servers, wrote efficient data-mapper APIs for converting raw files to structured JSON data and developed time and storage-efficient algorithms for data merging, saving over 60% of required DB storage, and improved data processing time by 20% through new API services with FreeMarker templates.
- Integrated Pendo to analyze user behavior and developed a UI for visualizing the corresponding statistics.
- Worked on Integrations with QuickBooks, Xero and implemented ScreenScaper for fetching rate, ratings etc from different sources of the web.

Quicken Inc. (Intuit Product), Bengaluru, India

Jan 2022 - Jun 2022

| Cloud Developer Intern

- Collaborated with the Cloud Services team as a Java developer which was responsible for maintaining the subscription services of Quicken's flagship product (a personal finance and money management application).
- Upgraded Spring Boot and Gradle, code syntax for compatibility, and performed regression testing before production.
- Identified a bug in the system wherein a user can have unbounded extensions of the subscription without paying for it; handled exceptions for such a scenario and deployed a fix to the application, which had a significant monetary impact on the company.

ACADEMIC PROJECTS

College Data-Center | Node.js, React.js, MySQL

- Streamlined database management at MSRIT by enhancing the user interface, preventing duplicate entries, and empowering department heads with access control updates.
- Constructed the frontend for MSRIT database management tool, improving user interface and accessibility; implemented auto-filling of data by scraping from the web-based on Digital Object Identifier(DOI), reducing manual data-entry by 90%.
- Designed and implemented an algorithm to prevent duplicate entries, ensuring data integrity and reducing error risks during database operations.

Indian Sign Language to Text Converter | Python, OpenCV, TensorFlow, Flask

- Devised an ISL (Indian Sign Language) to Text converter application with Python, OpenCV, TensorFlow, etc. to facilitate communication for hearing-impaired individuals by translating ISL gestures to textual form.
- Utilized Machine Learning algorithms and Computer Vision techniques to accurately interpret ISL gestures and convert them into corresponding text, improving communication efficiency.
- Implemented a user-friendly interface for enhanced accessibility and usability, ensuring seamless interaction for both sign language users and non-signers, and integrated real-time feedback mechanisms to refine translation accuracy.

TECHNICAL SKILLS

- Programming Languages: Java, SpringBoot, Python, SQL, NoSQL, HTML, CSS, Angular JS
- Tools: Bootstrap, Git, JUnit Tests, Integration Testing, Jenkins, SDLC, Agile
- Operating Systems: OSX, Linux, Windows | Software: Postman, IDEA

EXTRA CURRICULAR ACTIVITIES

- Collaborated at the Robotics Club, MSRIT for seminars and workshops, organizing sessions, developing materials, coordinating speakers, and mentoring juniors. (2018-2022).
- Represented college at VTU south-zonal sports meet in a 10 km race and secured 63/350 rank, 2020.
- Volunteering in community groups such as NSS in addressing diverse social issues since 2018.
- Won State Level Motorcycle Championship under the 200cc category organized by KTM in 2017.
